

Northeast Wisconsin Stormwater Consortium (NEWSC)

IDDE Committee Meeting Agenda

Tuesday, February 16, 2010

1:30 p.m – 3:30 p.m.

OMNI Associates, Inc.

Attendees: Brian Wayner, Matt Heckenlaible, Sue Olson, Matthew Marmor, Eric Thiel, Allen Davis, Ted Rohloff, Dena Mleziva

I. Call meeting to Order

II. Review Minutes from January Meeting

Minutes were approved with no changes

III. NR-151 Discussion – comments must be submitted by March 12, 2010

Matt distributed draft of the NEWSC 151 comments

Notes from Discussion: Attach the tables, attach the list of paid members – corporate members will be added, send out email – put it on the website, you have 1 week to make comment, otherwise we will assume you agree with the document and your municipality will be added to the signature page. For the NEWSC letter – we should ask DNR to clarify .37, this value will have different impacts on NEWSC members. Each municipality is encouraged to take these statements and send in their own

IV. Restaurants

We have received permission to use the language from the bilingual one page restaurant BMP. Jessica will look into graphics.

The city of Alexandria has given us permission to use their Compliance Inspection Checklist for Food Service – the committee reviewed the document and made changes

V. Spills Poster and Instructions

A request has been made for IDDE to design a 1 page poster – in the event of an emergency The poster that we have in hard copy from Matt does not instruct the user to call 911.

We will use Matt's poster to start.

Assignment: Jessica will also search EPA website for spills posters to model.

VI. Dumpster Management

The dumpster management BMP brochure was reviewed and changed. This brochure will be bilingual. Depending on Target audience members may want to send an 11x17 poster or a trifold brochure.

Assignment: Jessica will send updated documents to translator. We hope to have final documents ready for review by March's meeting

VII. Grocery

Item skipped - will be discussed at a future meeting

VIII. Parking Lots

Sweeping – Dena reported on her findings:

Green Bay Sweep Service, for business to sweep on a regular basis it will save on maintenance.

Debris gets put in waste management dumpster, sometimes debris gets used as fill. GB Sweep Service uses dry sweepers, some servicers use water.

IX. Next meeting date, time, and agenda

March 16, 1:30-3:30

April 13, 1:00-3:00

151 take off, website update, wrap up restaurant, dumpster management, spill poster and instruction, group car washing, grocery and parking lots

X. Other

Car wash – notes from discussion:

Guidelines to make your carwash watershed friendly

Wash in a grass area

Clean up mud tracked from grass area to parking lot

Pre-sweep the parking lot – not into the storm drain

Wash so that run-off is run into a grassy area

Use phosphorous free soap

Is there an inlet protection device?

Assignment: Check EPA website for carwash – Jessica will put together information for group carwashes for next meeting

XI. Meeting Adjourned
