

Northeast Wisconsin Stormwater Consortium (NEWSC)

Notes from May 10 Full Consortium Meeting Break Out

Post Construction

1. Post Construction BMP educational brochures for owners, residents, etc.
2. Reopen Model Ordinances
3. Educational signage for other post construction BMPs (like biofiltration)
4. Detailed guidance document on NR151/TMDL key issues/changes, how it impacts communities
5. Staff training for Public Works and Park & Rec laborers – PC and Pollution Prevention
6. MEP template document

Erosion Control

1. Training for EC – target inspectors
2. Erosion Control BMP library for proper installation to include short video clips and/or simple flyers/brochures
3. Reopen Model Ordinances
4. Detailed guidance document on NR151/TMDL key issues/changes, how it impacts communities
5. Staff training for Public Works and Park & Rec laborers – EC
6. MEP template document

Information & Education

1. Attend County Fairs
2. Put together Education Materials for teachers
3. Educational signage for recreation areas, boat launches, waters edge
4. Educational signage for other post construction BMPs (like biofiltration)
5. Brochure with educational opportunities provided and/or available from NEWSC to give local event organizers
6. Staff training for Public Works and Park & Rec laborers – Pollution Prevention
7. More PSA's or start them again, get them out to members
8. Participate at Tall Ships event in July in Green Bay
9. Partner with other groups to give/sell rain barrels
10. Rain Garden Initiative
11. Sample ordinance gathering – (specifically litter control & pet waste) – ask for members who think they have good ordinances to offer theirs as samples to post on website.

Tools & Resources

1. Education for Municipal Officials – NEMO
 - a. Look at getting the newest version
 - b. Have NEWSOC go to communities to present this info
 - c. Look into working with league of municipalities/alliance of cities
2. Staff training for Public Works and Park & Rec laborers – Pollution Prevention, EC and PC

Illicit Discharge Detection & Elimination

Leadership Council or as information comes to us

1. Information on water quality statewide – how/what are other communities doing compared to what we are doing
